Regain control of your loan portfolios and become a shining star on behalf of your investors and board.

Since 1981, Nortridge Software LLC, has provided lenders with the tools they need to successfully manage their loan portfolios. Guided by its mission to optimize loan servicing and management offices, Nortridge has leveraged its extensive experience in banking, lending and software development to help clients improve account management, develop operational efficiencies and increase profitability.

The company's flagship offering, Nortridge Loan System (NLS), includes Customer Relationship Management and Loan Servicing, encompassing Collections, Funds Disbursement, Security, and Reporting. Additional modules include Participations, Multi-Book Accounting and Escrow Analysis. Workflow management automates the front-end and back-end tasks related to the normally time-consuming loan origination process (including document generation), credit line extensions and approvals, and any simple or complex workflow tasks requiring tracking and automation.

NLS is offered both as a license and Software as a Service (SaaS), also known as a "hosted" offering.

With headquarters in Lake Forest, Calif., Nortridge has provided quality software solutions and excellent support services to more than 2,500 clients worldwide. *For more information, visit www.nortridge.com.*
